My Art in Different Styles

Photo Editing

You can change the appearance of an image to **highlight something in it** or to **suggest a mood/feeling** (e.g. coldness, magical, happiness).

Crop lets you cut out parts you don't want.

Apply **filters** or effects to change the colours.

Remove **blemishes** like dust or dirt.

Add a **border** or frame so it looks neat.

Adjust the **brightness** and **contrast** so it is lighter or darker.

Blur parts so your eyes focus on the main subject.

Safe Searching

How a Search Engine Works

Search engines **crawl** or scan websites and **index** summaries of them on their servers.

When you search, they quickly scan this index for **matching words**.

Search results are **ranked** into an order by:

- how **relevant** they are;
- how **popular** they are;
- which **language** they are in;
- if they have paid to be a **sponsored link** at the top;
- your **search history**.

Key Vocabulary

Index	Words in alphabetical order that show you where they are mentioned.	
Matching	Finding something that is the same.	
Ranked	Information put in order of how good or useful it is.	
Relevant	Information that will help you find the answer.	
Popular	Information that lots of people search for.	
Sponsored	Information that a company pays to be more noticeable.	

What should I already know about privacy?

- ✗ Remember: we **never** share our full name with anyone online.
- ✗ Things like where we live or where we go to school should **never** be shared with strangers.

- ✗ Never share your passwords with other people.
