Environment

Natural Processes

To know that materials can be sorted into different groups according to their properties and how they are used. Eg: sorting materials found at the seaside or in a forest (shells and seaweed or rocks and leaves).

To know the names of and key information about mini-beasts.

To know that a butterfly changes over its lifetime. To know the names of the stages: egg, caterpillar, cocoon, butterfly.

To know how to test ideas, such as why some objects float and some sink.

Changes to the World

To know that the environment where they live can be affected by people. Eg: dropping litter.

To know that the wider environment is affected by human activity. Eg: pollution in the sea.

To know that people need to look after living things and the environment.

To know how they can improve the environment where they live. Eg: litter picking, or walking to school.
