Science: Seasonal Changes

Autumn 2: Year 1

The Four Seasons ✓

There are four seasons:

- Spring
- Summer
- Autumn
- Winter

Weather in Different Seasons ✓

In Spring it starts to get warm.

In Summer the weather is hotter. The days are long.

In Autumn it starts to get cold. Days get shorter.

In Winter the weather is colder. Sometimes it can be frosty or snow.

Key Vocabulary ✓

seasons

Different parts of the year.

observe

When we use our eyes and different tools to look at things around us.

weather

The way it feels and looks outside.

rain gauge

A tool we use to measure the amount of rain.
